

Activair® with EasyTab™
is different to anything
that's come before.

EASY TO HANDLE,
EASY TO OPEN PACKS

UNIQUE, EASY TO
USE, LONGER TAB

LONGER LASTING
PERFORMANCE

Activair batteries use zinc air technology:
proven to perform consistently across the full
range of hearing aids - including high and
low power, digital and analogue. And with a
name like Duracell, the world's premier battery
brand, on the box, you know you can trust
EasyTab never to let you down.

	10 (Yellow Tab) Replaces 10, DA10, PZA230, 10AE, V230A

How to care for your Activair batteries.

- Keep batteries in their protective pack
- Store batteries at room temperature - never in the refrigerator
- Don't remove the colour-coded tabs until you're ready to use the battery
- Don't carry batteries loose in your pocket or let them come into contact with metal objects
- Don't dispose of batteries in fire
- Don't try to recharge batteries

And remember

If you're not entirely happy with your Activair® with EasyTab™ batteries - whether in performance or ease of use - we want to hear from you. Just contact your local Activair Hearing Specialist who will pass your comments on to us.
